

The purpose of this message is to urge you to reject petition 04-160 as proposed by the National Association of Broadcasters. The Traffic and weather service as provided by XM Radio has saved me time and money since its broadcast inception. I have used the service while travelling around the major East Coast cities on many occasions. The service has allowed me to make travel routing decisions that have saved me both time and fuel expense by avoiding traffic jam situations.

Again, please reject petition 04-160.
